

Table of Contents

1. Introduction	5
2. An Introduction to GeoGebra	7
2.1. Where to find the software and the licences available	7
2.2. Installing GeoGebra on a computer running MS Windows	8
3. GeoGebra's User Interface	9
3.1. The Menu Bar	9
3.2. Toolbar	15
3.3. GeoGebra Views	15
3.4. Preferences dialog box	20
3.5. Context Menu	22
3.6. Other dialog boxes	23
3.7. Navigation Bar of steps in the construction of an applet	26
4. The Graphics View	27
4.1. The Graphics View Toolbar	27
4.2. The Style Bar	32
4.3. Graphics View Preferences	33
4.4. Object Preferences in the Graphics View	35
4.5. Examples of GeoGebra constructions	36
4.6. Drawing the graph of a function illustrated by a linear function ...	52
4.7. Copying the Graphics View onto the system clipboard	57
5. The Algebra View	58
5.1. The Input Bar	60
5.2. Pre-set commands for creating geometric objects	62
5.3. Pre-set commands for object transformations	64
5.4. Ways in which objects are described in the Algebra View	64
5.5. Examples of GeoGebra constructions with the use of the Input Bar	66
6. Using the Graphics View and Algebra View – graphs and properties of quadratic functions	75
7. The Spreadsheet View	87
7.1. The Spreadsheet View Toolbar	88
7.2. The Style Bar	89
7.3. Input data into spreadsheet cells	90

8. The 3D Graphics View – spatial geometry	96
8.1. 3D Graphics View tools	97
8.2. Cube	99
8.3. Pyramid	102
8.4. Solids of revolution	107
9. The Construction Protocol	115
9.1. Working with the Construction Protocol	115
9.2. Style Bar of the Construction Protocol	116
10. Using GeoGebra to illustrate exemplary problems in the exercise sets for grades 10 – 12 published by Oficyna Pzdro	119
From Founder of GeoGebra	131
